

Pictures of Destruction and Civilian Victims of the Anglo-American Aggression in Iraq (From March, 2003 onwards).

Please note that some of these pictures are not suitable for small children and those who have weak hearts. The following pictures are only of a very tiny fraction of the thousands of Iraqi Civilian Victims who have been terrorised, humiliated, injured, maimed and killed through British and American Bombing of civilian areas in various cities of Iraq. Due to insecurity, Independent Reporters could not and still can not reach many areas to photograph and report the atrocities. Even after the bombing had stopped, thousands of civilians continue to suffer and die due to their severe injuries. We kindly request Independent News Reporters to send us photos of the Anglo-American atrocities in Iraq for inclusion on these pages.
